50 SW

Inspector General

Innovator of the Quarter – Lt Dan Brunski

4 Major Graded Areas:

1. Managing Resources
2. Improving the Unit
3. Leading People
4. Executing the Mission

Go the Extra MILE

Lieutenant Dan Brunski, from the 3rd Space Experimentation Squadron, led the Autonomous Nanosatellite Guardian for Evaluating Local Space (ANGELS) 1 year campaign plan. Using the unique design of the ANGELS system, Lt. Brunski developed a process to use the satellite to depict realistic threat replication. His process enabled the delivery of Red vs Blue events in five AT scenarios. Additionally, he developed satellite flight paths optimizing fuel consumption and extending the life of the ANGELS system by three months to meet end of life objectives. Furthermore, he authored threat identification software that fused the Satellite-as-Sensor Program with the operations systems. This software significantly reduced the operators' response times to hostilities. Lt Brunski went above and beyond authoring a new Operations Group wide instruction on co-orbital engagements. He trained over 50 members and laid the foundation for a threat-based dwell training.

Lt Brunski went above and beyond authoring a new Operations Group wide instruction on co-orbital engagements. He trained over 50 members and laid the foundation for a threat-based dwell training.

Lessons Learned

1. Work with other unit/group/wing program managers within your program for additional guidance and/or areas to improve.
2. ALWAYS BE PREPARED
Ensure your unit knows the appropriate response and actions to take during emergency scenarios
3. Keep records updated as unit POCs and leadership changes out, remember to update all appointment and guidance letters as applicable.

50 SW/IG Contact Information

50 SW Inspector General:	Lt Col Rickie Banister	567-3764
Director of Inspections:	Mr. Lou Fischer	567-4069
Director of Complaints:	Mr. Gregory Deas	567-4302
50 SW/IG Superintendent:	MSgt Brian Contreras	567-3417
CCIP/WIT Manager:	Capt Branden Jarmon	567-5047
Exercise Program Manager:	Capt Tracey Harris	567-5757
FAM Program Manager:	TSgt Martin Howard	567-2032
MICT/SAPM Manager:	SSgt David Gutierrez	567-3069
IGEMS Manager:	SSgt Theodore Barnaby	567-2960

MICT/ IGEMS/FAM/Exercise Updates

How do we improve upon MICT/IGEMS/FAM/Exercise after the UEI?

Second Quarter MICT Deep Dive: By SSgt David Gutierrez, III

During the month of March, the IG office conducted another MICT Deep Dive. This Deep Dive focused heavily on the observations for each unit. The IG office looked primarily to see if Corrective Action Plans were loaded and made sure the observations are reassessed every month. Unlike other inspections by the IG, the Deep Dive does not require fix actions. This process merely provides a second look at the Squadron programs to provide improvement areas to the units. The most common feedback we provide on the observations is to make sure the estimated completion date is updated and that the observations are reassessed every 30 days. If there are any questions regarding supporting documentation or general MICT/SAPM questions, please contact SSgt Gutierrez at 567-3069.

IGEMS: SSgt Theodore Barnaby

Unit Deficiencies: During the course of an inspection or exercise we come across two types of deficiencies. Unit-identified deficiencies are anything that the unit already knows about and has started working to correct. Undetected deficiencies are problems that IG finds, but no one else has documented.

All deficiencies are identified in the official inspection report, but unit-identified deficiencies may not have to go through the entire IGEMS closure process. As long as a Corrective Action Plan has already been established, the closure authority can request cancellation of any unit-identified deficiency. Once cancelled, the deficiency is removed from IGEMS, allowing the unit to correct it at the lowest level.

Please direct any questions or concerns to SSgt Theodore Barnaby/567-2960.

EXERCISES: Capt Tracey Harris

Did you forward deploy in support of the Wing's Continuity of Operations (COOP) Exercise in March? This is one of the four major exercise events that the IG plans each year. The goal of each exercise is to ensure we are ready for anything that the world can throw at us and that our leadership can levy upon us.

Exercises are quarterly and are used to meet requirements from AFI 90-201, *The Air Force Inspection System*. These are in addition to our monthly short-sprint exercises but on a larger scale.

Speaking of large scale, expect next quarter's exercise to be huge! Don't say we didn't warn you.

Please direct any questions or concerns related to previous and upcoming exercises to Capt Tracey Harris/567-5757.

Upcoming Inspections

APRIL 2017

CCIP: 23 SOPS Det 1, SAPR, Records Management, Privacy Act, FOIA

FAMs: Week 1: Records/FOIA/PA, Government Travel Card, Pubs and Forms, ATO, Resource Management; Week 2: CSS, Voting Assistance Program, SQ/CC Activities and Functions, Space Training System; Week 3: Occupational Safety; Week 4: OPSEC, SORTS/DRRS

MAY 2017

CCIP: 50 CPTS, 21 SOPS Det 1, Community Support Coordinator, OPSEC

FAMs: Week 1: PWCS (Cell), ITAM Hardware-BECO, Stage 1- All Shops ESOHCAMP (CES, 4 SOPS, 23 SOPS), GPC, Emergency Management/AFIMS; Week 4: COOP, IMR (Unit CC), AEF Reporting Tool, Deployment Planning and Execution and Deployment Health (Unit CC), Weapons and Tactics.

JUNE 2017

CCIP: Emergency Management OV 17-2

FAMs: Week 1: LeaveWeb, Radio Management (LMR), Space Systems Maintenance Management; Week 2: SABC, UFPM, Unit Training Manager, Supervisor/Trainer Knowledge; Week 3: AF Strength Accounting Duty Status; Week 4: INFOSEC, INDSEC, PERSEC.
